

A fluted cast iron radiator is positioned against a light blue wall with white decorative paneling. The radiator has a series of vertical fluted columns and is supported by two small, angled feet. To the right of the radiator is a window with light-colored curtains. In the foreground, a glass coffee table with a metal frame is visible, reflecting the radiator and the room. A patterned rug is partially visible under the coffee table.

GRACE

FLUTED COLUMNS

A fluted cast iron radiator with linear moulding and inclined feet. Staggered cross braces and a utilitarian design make Grace a timeless heating solution.

GRACE

Fluted cast iron column radiators with linear moulding and inclined feet. Staggered spacing between columns adds extra interest. A timeless classic.
